SETUP STEPS

1. Camera's default IP address is: 192.168.5.191 (Tracking) / 192.168.5.192 (Wide-angle).
To change it, access the camera's IP address via a web browser.
2. Camera's video parameters can be changed via its web interface.
3.Tracking settings are changed via IVESmart tool. It can be downloaded from our website in FIRMWARE & APPLICATIONS or scan the code to access the page directly.

To configure, follow the steps below:

1. Press "Stop" to stop tracking.
2. Press "Config", set "Panoramic" and "Platform presets.
3. Define "Platform", "Tracking" and "Mask" areas.
4. Adjust tracking parameters.
5. Press"Save Param." and start tracking.

To download User Manual please visit www.a-dena.com and go to TECHNICAL INFORMATION under RESOURCES.
