Dimension	80(L) x 64(W) x 24(H)mm
Weight	75g

Wireless Projection Button

Configuration

Set-up the wireless projection

Before the Set-up:

1. Refer to the Configuration Diagram. Connect AREC Media Station to the LAN port of a router and find out the station's IP address. For example, you can see it on the bottom-right part of the GUI (by default the GUI is available via HDMI output).

2. Connect your computer to the same LAN network and open a browser.
3. Type the station's IP address and proceed to the Administrator page. Please refer to the station's user manual to learn how to log in.
4. Via Media I/O -> Video inputs, change Signal type to Wireless projection and enable PC HID control if your screen is an interactive flat panel display (IFPD)

3. Press [Pair] button to get into pairing mode.

4. Connect the USB cable of ARECast to your computer for pairing.

5. After waiting for 3-5 seconds, the "Pair Status" will show "finished".

6. Disconnect the USB cable first, then connect both the USB and HDMI cables to your computer. ARECast's LED button will first start flashing red (pairing) and then change to steady blue (ready for projection).

7. The device is ready. Press on the button to project!
