

AT-VTPG-1000VL

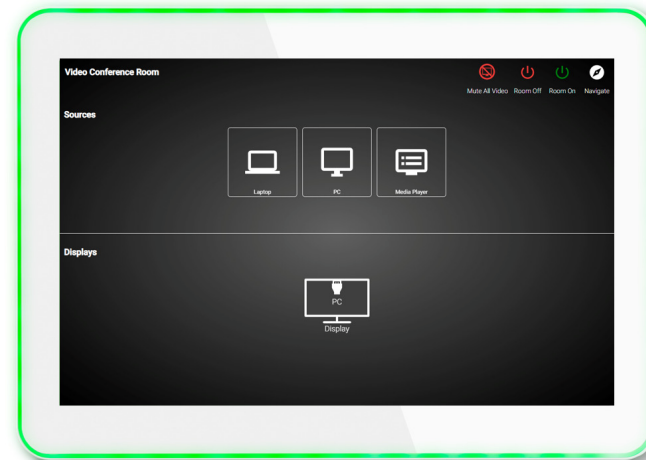

Velocity™ All-In-One 10" Touch Panel with Gateway

Velocity VTPG-1000VL

Introduction

- What it is
 - All-in-one Velocity control system for one room of AV and two of scheduling
 - Combines a 10" touch panel and Velocity gateway into a single device
- Why we made it
 - Ideal solution for customers who prefer one controller per room over a multi-room gateway
- Value propositions
 - Cost effective all-in-one solution for AV control of one room and scheduling of two
 - Intuitive configuration allows creation of complete systems or modifications in minutes, free of extensive programming
 - Simplifies wiring by controlling multiple devices through a single Ethernet connection

Velocity VTPG-1000VL

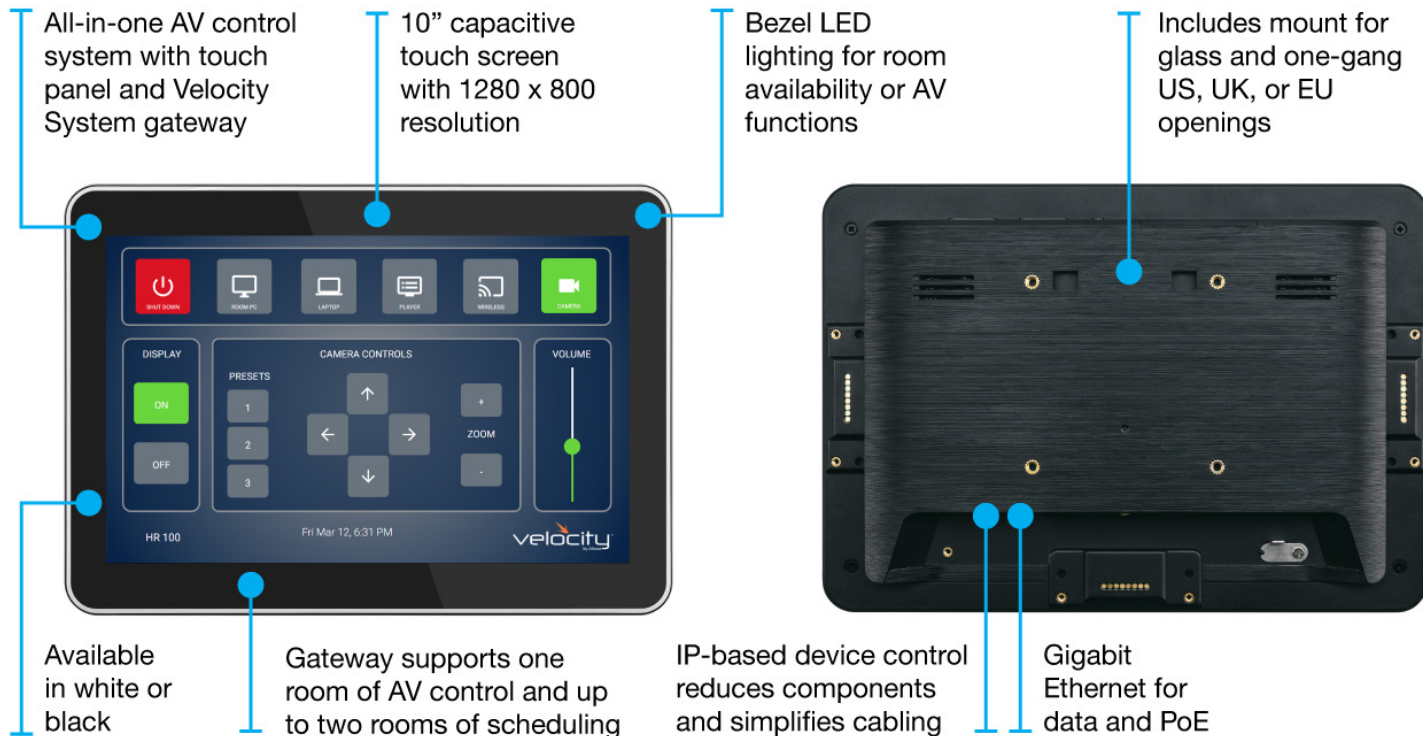

Key Features

- All-in-one AV control system
- 10" touch panel with surround bezel LED lighting
- Velocity gateway supporting one room of control for up to 24 devices and two rooms of scheduling
- Intuitive, browser-based tool for simplified system configuration
- IP-based device control reduces components and simplifies cabling
- Works with VCC's for compatibility with RS-232, IR, relays, or sensors
- Supports QR code BYOD control
- Dual purpose glass and one-gang wall mount
- Optional AT-VTP-VTM tabletop mounting kit
- PoE for remote power and network connection with a single cable

Velocity VTPG-1000VL

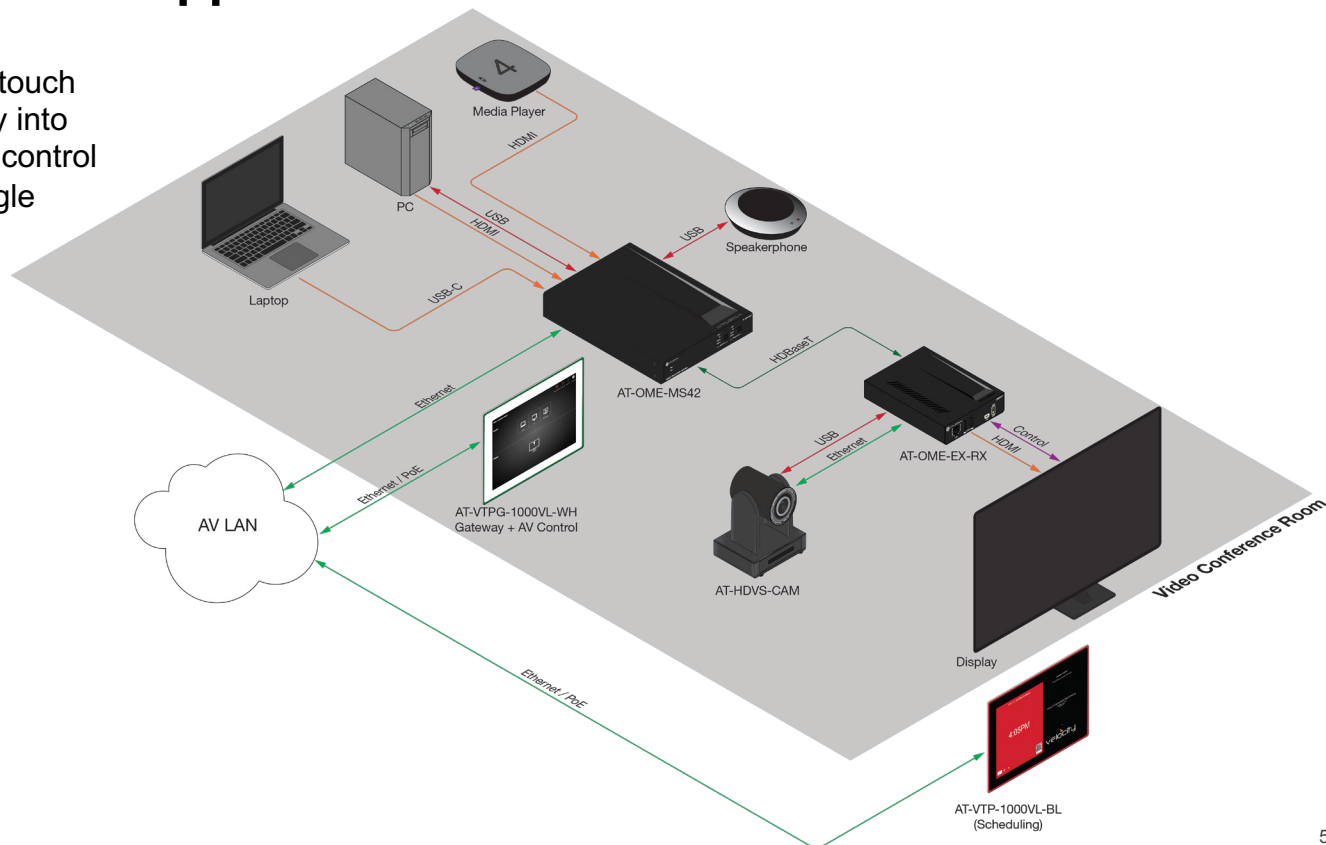

Product Highlights

Velocity VTPG-1000VL

Video Conference Room Application

VT-VTPG-1000VL combines a 10" touch panel and Velocity System gateway into one device, providing complete AV control and scheduling functionality for single room applications
